Including Older Adults

GUIDE TO OUR SERVICE Maintenance Care

ACCESS PROCEDURE

The admission application must be submitted to the CAD of the ASL where the applicant, family member or legal representative resides, after completing the appropriate form.

The request may also be submitted:

- by the ASL territorial services;
- by the hospital facility where the applicant was admitted;
- by the territorial services of the municipality of residence.

The Multidimensional Assessment Unit (UVM) of the applicant's ASL, after examining the case, issues its opinion and suitability assessment, allowing admission to the waiting list.

The suitability assessment for admission must be submitted to ASL RM 5 (Admissions Office – Tivoli Hospital "San Giovanni Evangelista", Via Antonio Parrozzani 3), which also manages the relevant waiting list for admission to the facility.

Based on the waiting list and bed availability, the applicant will be contacted in advance to arrange the admission date and provide the necessary information.

ADMISSION

At the time of admission, the Guest must provide the Reception Offices with the following administrative documentation:

- admission authorization issued by ASL RM 5;
- personal identification document;
- health insurance card;
- health booklet and, where applicable, exemption from healthcare co-payments;
- any disability assessment certificate;
- any documentation relating to the attendance allowance;
- Social and Healthcare ISEE certificate;
- where applicable, a statement of commitment from the Municipality/District regarding co-payment of the accommodation fee.

The Guest must also provide/deliver the following documents to the ward:

- report from the attending physician and/or discharge letter if transferring from another healthcare facility;
- copies of medical tests, clinical records and healthcare documentation;
- current medication therapies (a one-week supply of medication must be provided);
- personal or ASL-issued medical aids assigned to the Guest.

In addition, the following will be formalized at the time of admission:

- authorization for the processing of personal data;
- where applicable, the procedure for changing the General Practitioner;
- commitment to pay the portion of the fee charged to the Guest.

Upon admission, the Guest will receive the Internal Regulations, which, together with the Service Charter, have contractual value.

PROJECT DURATION AND RENEWAL

Every 30–90 days, the UVM of ASL RM 5 carries out an assessment visit. Following this assessment, the stay may be extended or, if the Guest is deemed unsuitable to remain, the need for transfer to another facility may be reported.

FEES

This type of treatment provides for a standard daily fee based on the intensity level of treatment (high or low), split 50% between the Regional Health Service (S.S.R.) and the Guest.

Specifically, the RSA facilities in the central complex have only High-intensity Maintenance Care beds, with a daily fee charged to the Guest of €64.86*. The Guest may request cost-sharing from their Municipality of Residence, depending on their income, by submitting a formal application accompanied by the Guest's Social-Health ISEE certificate.

To assist the Guest and their family members, a CAF help desk is available at the Facility, where they can obtain free assistance with ISEE procedures. The Facility is in no way responsible for the service provided by the help desk, nor for any errors made in carrying out the procedures.

- * The intensity level of Maintenance Care is established by the competent ASL at the time of the admission assessment and may vary according to the clinical condition during reassessments for confirmation of the treatment
